Thanks Mike. Let me know what we need to do short of wholesale re-review and revisions.

Joan- I will talk with folks here. Yes, we are supportive of this going forward and I apologize if it doesn't seem like it.

Folks. I thought we were on a more clear glide path to getting this to OMB and have OAR concurrence for the approach--consistent regulation with the Utah air program and a basin-specific approach that is protective for ozone. I'm asking that the Regional priority continue to move forward. How can we get on the same page? Thanks.

Thanks, Bruce. Just so I'm clear, Elliott's comments that particularly relate to consistency with OOOOa, will be easy to spot within the FIP document he edited?

Joan,

Per our discussion this afternoon regarding Elliott's comments on the U&O FIP, here is the very latest version of the NSPS that reflects any minor changes made since the rule went to OMB. As you mentioned, this will allow the FIP team to respond to Elliott's comment that the FIP should accurately reflect (where intended) the NSPS final rule rather than what was in the September proposal, given the significant changes since proposal.

Of course this is not to be distributed.

Hope this is helpful,

Bruce
